

# NEW JERSEY INSTITUTE OF TECHNOLOGY

## Department of Civil & Environmental Engineering

MECH 235-002 and MECH 235-004: Engineering Mechanics: Statics

Spring 2024

**Text:** ENGINEERING MECHANICS - STATICS  
Pearson, Any Edition

**Class:** MECH 235-002 and MECH 235-004

**Format:** Hybrid

**Location:** ECEC 100

**Time:** MONDAY 10:00 – 11:20 AM (Online)  
WEDNESDAY 10:00 – 11:20 AM (In Class, ECEC 100)

**Instructor:** Prof. S. Saigal, Ph.D., P.E.  
Email: [saigal@njit.edu](mailto:saigal@njit.edu), 213 Colton Hall, 973-596-5443

**Teaching Assistant:** TBA

**Office Hours:** Wednesday 11:30 AM – 1:00 PM

**Webex Link:** <https://njit.webex.com/meet/saigal>

**Prerequisites:** Phys 111, Math 112. Provides an understanding of equilibrium of particles and rigid bodies subject to concentrated and distributed forces.

**Students must earn a C or better in this course to register for Strength of Materials, MECH237.**

## **ACADEMIC INTEGRITY**

Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at: <http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>.

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at [dos@njit.edu](mailto:dos@njit.edu)”

## SYLLABUS

|    |                                                                                      |
|----|--------------------------------------------------------------------------------------|
| 1  | Ch 1: Introduction<br>Ch 2: Statics of Particles, Trig Method (sketch force polygon) |
| 2  | Ch 2: Rectangular Components<br>Equilibrium of a Particle                            |
| 3  | Ch 2: Force in Space<br>Forces and Equilibrium in Space                              |
| 4  | Ch 3: Rigid Bodies:<br>Equivalent System of Forces. Scalar (Dot) Products            |
| 5  | Ch 3: Couples and Force-Couple Systems<br>Equivalent Systems                         |
| 6  | Ch 4: Equilibrium of Rigid Bodies<br>Equilibrium of a 2-Force Body                   |
| 7  | MIDTERM EXAM<br>Ch 5: Centroids and Center of Gravity                                |
| 8  | Ch 5: Distributed Loads                                                              |
| 9  | Ch 6: Truss Analysis: Method of Joints                                               |
| 10 | Ch 6: Truss Analysis: Method of Sections                                             |
| 11 | Ch 6: Frame Analysis                                                                 |
| 12 | Ch 9: Moments of Inertia                                                             |
| 13 | Ch 9: Parallel Axis Theorem                                                          |
| 14 | Problems and Review for Finals                                                       |

- Students will be informed in advance by the instructor of any modifications or deviation from the syllabus throughout the course of the semester.

**SEMESTER WEEKS**

| <b>WEEK #</b>   | <b>DAY</b> | <b>DATE</b> | <b>NOTES</b>  |
|-----------------|------------|-------------|---------------|
| WEEK 1          | Wednesday  | 17-Jan      |               |
| WEEK 2          | Monday     | 22-Jan      |               |
|                 | Wednesday  | 24-Jan      |               |
| WEEK 3          | Monday     | 29-Jan      |               |
|                 | Wednesday  | 31-Jan      |               |
| WEEK 4          | Monday     | 5-Feb       |               |
|                 | Wednesday  | 7-Feb       |               |
| WEEK 5          | Monday     | 12-Feb      |               |
|                 | Wednesday  | 14-Feb      |               |
| WEEK 6          | Monday     | 19-Feb      |               |
|                 | Wednesday  | 21-Feb      |               |
| WEEK 7          | Monday     | 26-Feb      |               |
|                 | Wednesday  | 28-Feb      |               |
| WEEK 8          | Monday     | 4-Mar       |               |
|                 | Wednesday  | 6-Mar       |               |
| SPRING<br>BREAK | Monday     | 11-Mar      | SPRING RECESS |
|                 | Wednesday  | 13-Mar      | SPRING RECESS |
| WEEK 9          | Monday     | 18-Mar      |               |
|                 | Wednesday  | 20-Mar      |               |
| WEEK 10         | Monday     | 25-Mar      |               |
|                 | Wednesday  | 27-Mar      |               |
| WEEK 11         | Monday     | 1-Apr       |               |
|                 | Wednesday  | 3-Apr       |               |
| WEEK 12         | Monday     | 8-Apr       |               |
|                 | Wednesday  | 10-Apr      |               |
| WEEK 13         | Monday     | 15-Apr      |               |
|                 | Wednesday  | 17-Apr      |               |
| WEEK 14         | Monday     | 22-Apr      |               |
|                 | Wednesday  | 24-Apr      |               |
| WEEK 15         | Monday     | 29-Apr      |               |

## **IMPORTANT DATES**

| <b>MONTH</b> | <b>DATE</b> | <b>DAY</b> | <b>NOTES</b>                                                                                          |
|--------------|-------------|------------|-------------------------------------------------------------------------------------------------------|
| January      | 15          | Monday     | Martin Luther King, Jr. Day                                                                           |
| January      | 16          | Tuesday    | First Day of Classes                                                                                  |
| January      | 20          | Saturday   | Saturday Classes Begin                                                                                |
| January      | 22          | Monday     | Last Day to Add/Drop a Class                                                                          |
| January      | 22          | Monday     | Last Day for 100% Refund, Full or Partial Withdrawal                                                  |
| January      | 23          | Tuesday    | W Grades Posted for Course Withdrawals                                                                |
| January      | 29          | Monday     | Last Day for 90% Refund, Full or Partial Withdrawal, No Refund for Partial Withdrawal after this date |
| February     | 12          | Monday     | Last Day for 50% Refund, Full Withdrawal                                                              |
| March        | 4           | Monday     | Last Day for 25% Refund, Full Withdrawal                                                              |
| March        | 10          | Sunday     | Spring Recess Begins - No Classes Scheduled - University Open                                         |
| March        | 16          | Saturday   | Spring Recess Ends                                                                                    |
| March        | 29          | Friday     | Good Friday - No Classes Scheduled - University Closed                                                |
| March        | 31          | Sunday     | Easter Sunday - No Classes Scheduled - University Closed                                              |
| April        | 1           | Monday     | Last Day to Withdraw                                                                                  |
| April        | 30          | Tuesday    | Friday Classes Meet                                                                                   |
| April        | 30          | Tuesday    | Last Day of Classes                                                                                   |
| May          | 1           | Wednesday  | Reading Day 1                                                                                         |
| May          | 2           | Thursday   | Reading Day 2                                                                                         |
| May          | 3           | Friday     | Final Exams Begin                                                                                     |
| May          | 9           | Thursday   | Final Exams End                                                                                       |
| May          | 11          | Saturday   | Final Grades Due                                                                                      |

**Course Policies:**

- Attendance is mandatory.
- Please turn off all electronic devices (including cell phone, laptop, tablet) during class time.
- Bring your calculator each time to class.

**Grading Policy:**

| ITEM          | TIME      | GRADE (%) |
|---------------|-----------|-----------|
| Homeworks     | Weekly    | 10        |
| Class Quizzes | Each Week | 30        |
| Mid-Term Exam | Week 7    | 30        |
| Final Exam    | Week 15   | 30        |
| TOTAL         |           | 100       |

- There will be NO make-up quizzes or exams.
- Quizzes and Exams must have Free-Body-Diagrams with Force Vectors shown. ALL work must be shown for full credit.

**Grading Scale:**

|     |          |
|-----|----------|
| A:  | 100-90   |
| B+: | 89-85    |
| B:  | 84-80    |
| C+: | 79-75    |
| C:  | 74-70    |
| D:  | 69-60    |
| F:  | Below 60 |

**Homework Policies:**

- Follow the syllabus and do the assigned homework problems
- Have your homework ready each class meeting.
- Homework may be collected on a random basis. Not all assigned problems will be collected. Only a select few will be collected randomly.
- NO late homework will be accepted.
- All homework MUST include a Free-Body-Diagram to show Force Vectors. All work must be shown for full credit.
- Homework NOT submitted will earn MINUS points deducted from your overall quiz grades.

**Helpful Suggestions:**

- Take notes and pay attention.
- Ask questions.
- Participate with board work and/or class problem solving.

**Tutoring:**

Tutoring facilities will be provided for the class. Additional information concerning tutoring will be provided in the class and posted on CANVAS.

## CEE Mission, Program Educational Objectives and Student Outcomes

The mission of the Department of Civil and Environmental Engineering is:

- to educate a diverse student body to be employed in the engineering profession
- to encourage research and scholarship among our faculty and students
- to promote service to the engineering profession and society

Our program educational objectives are reflected in the achievements of our recent alumni:

1 – Engineering Practice: Alumni will successfully engage in the practice of civil engineering within industry, government, and private practice, working toward safe, practical, resilient, sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.

2 – Professional Growth: Alumni will advance their skills through professional growth and development activities such as graduate study in engineering, research and development, professional registration and continuing education; some graduates will transition into other professional fields such as business and law through further education.

3 – Service: Alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, charitable giving and other humanitarian endeavors.

Our Student Outcomes are what students are expected to know and be able to do by the time of their graduation:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Revised: 2/20/2024

| Strategies, Actions and Assignments                                                                                                 | ABET Student Outcomes (1-7) | Program Educational Objectives | Assessment Measures                            |
|-------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|--------------------------------|------------------------------------------------|
| <b>Student Learning Outcome 1: Identify transition from Physics (science) to Statics (engineering).</b>                             |                             |                                |                                                |
| Present engineering approach and problem solving techniques used for vector analysis.                                               | 1                           | 1                              | Homework, exams and success in future courses. |
| Illustrate applications to practical problems of torque, moments, and couples.                                                      | 1                           | 1                              | Homework, bonus problems, and exams.           |
| <b>Student Learning Outcome 2: Analyze and calculate two-dimensional and three-dimensional vectors.</b>                             |                             |                                |                                                |
| Illustrate 2D vector components by orientation using trigonometry and proportions.                                                  | 1                           | 1                              | Homework and exams.                            |
| Use vivid Power Point examples to demonstrate analysis technique for force systems on beams and trusses and frames.                 | 1                           | 1                              | Homework and exams.                            |
| Demonstrate logical approach to spatial vectors by visualization of forces, moments.                                                | 1                           | 1                              | Homework, exams, and bonus challenge problems. |
| <b>Student Learning Outcome 3: Diagram and employ free body diagrams to formulate and analyze solution of engineering problems.</b> |                             |                                |                                                |
| Require FBD's, for all problems and emphasize importance of vector directions.                                                      | 1, 2                        | 1                              | Homework, bonus challenge problems, and exams. |
| Illustrate the approach of going from the FBD to the problem solution by formulating the appropriate equation set.                  | 1, 2                        | 1                              | Homework, bonus challenge problems, and exams. |
| Provide numerous solved problems available on web. Require numerous homework problems weekly.                                       | 1, 2                        | 1                              | Homework, exams and bonus challenge problems.  |
