

Syllabus:
CE 450-002 Urban Planning
Spring 2020 – Revised 3.20.2020

Meeting Time:

1:00 PM – 3:50 PM, Thursday

Meeting Location:

Online

Instructor:

Wassim Y. Nader, PE, CFM
Email: wyn2@njit.edu

Office Hours:

N/A

Text Book:

Anderson, A.T., 2000. Planning the Built Environment. Planners Press, American Planning Association, Chicago Illinois. ISBN 1-884829-43-0.

Course Objectives

This course provides an opportunity for students to acquire entry level knowledge on urban planning, its principles, techniques, and uses. Topics include Land, Utilities, Transportation, and Residential areas - the basic elements of our built environment. This course emphasize practical knowledge and real world observations and student will be exposed to worldwide case studies based on cities, metropolitan areas, and other built environment.

Course Contents

1. Introduction to Urban Planning
2. Land
 - a. Land Form
 - b. Maps
 - c. The Constraints of Slope on Land Development

3. Utilities
 - a. Water Supply and Distribution
 - b. Wastewater Management
 - c. Storm Drains & Stormwater Management
 - d. Other Utilities (Gas, Electric, Cable, Internet, etc.)

4. Transportation
 - a. Transportation Planning
 - b. Street Capacity & Design
 - c. Highway Access & Integration
 - d. Parking
 - e. Transit Planning

5. Residential Areas
 - a. Housing
 - b. Residential Density
 - c. Neighborhood Planning
 - d. Environmental
 - e. The Subdivision Process
 - f. Single Family Subdivisions
 - g. Multifamily Development
 - h. Community Facilities

Grade Policy:

1. Homework	15%
2. Midterm Exam	25%
3. Case Study 1 (Group Presentation)	10%
4. Quiz	10%
5. Final Project & Presentation	30%
6. Attendance and Participation	10%

“Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues the degree that you are working on. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at:

<http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>

*Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. **Any student found in violation of the code by cheating, plagiarizing or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university.** If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu”*

CE 450 Class Schedule, Spring 2020

ID	Week of	Contents	Home Work
1	1/23	Introduction & Overview	Homework 1
2	1/30	Land Form, Maps and Slopes	HW01: DUE Work on Case Study 1
3	2/6	Utilities	Work on Case Study 1
4	2/13	Case Study 1 Presentations & Discussions	Case Study 1 DUE
5	2/20	Transportation Planning/ Street Capacity	Homework 2
6	2/27	Parking/Transit Planning	HW02: Due Study for Midterm
7	3/5	Survey Lecture	Study for Midterm
8	3/12	NJIT Classes Cancelled	
	3/19	SPRING BREAK	
9	3/26	Webex Class - Review of Info, New Class Schedule & Prep for Midterm	Study for Midterm Exam
10	4/2	Midterm Exam 1pm-4pm via Canvas	
11	4/9	Webex Class – Macro at Look at Planning	
12	4/16	Webex Class - Environmental Concerns in Neighborhood Planning	Study for Quiz
13	4/23	Webex Class - Intro to Final Project & Quiz	Work on Final Project
14	4/30	Webex Class - Building vs. Site	Work on Final Project
15	5/7	Final Presentations (Part 1) – Via Webex	Final Project DUE
16	5/8	Final Presentations (Part 2) – Via Webex	Final Project DUE
	5/16	Final Grades Due	

Course Outcome Matrix CE 450 Urban Planning

Strategies, Actions and Assignments	ABET Student Outcomes (1-7)	Program Educational Objectives	Assessment Measures
Student Learning Outcome 1: Acquire entry level knowledge on urban planning, its principles, techniques, and uses.			
Attend lectures on land, utility, transportation residential development	1, 2, 6 and 7	1, 2	Attending classes Homework
Student Learning Outcome 2: Gain exposure to worldwide case studies based on cities, metropolitan areas, and other built environment.			
Conduct case studies and perform analysis	2, 4, 5 and 6	1, 3	Class Project Homework
Student Learning Outcome 3: Gain practical Knowledge and real world observations of city development			
Participate in field trips to public planning agencies or transportation service providers	1, 3, 5 and 6	2, 3	Field trips
Role play in debating and game teams	2, 3, 4, and 5	1, 3	Game play debate

CEE Mission, Program Educational Objectives and Student Outcomes

The mission of the Department of Civil and Environmental Engineering is:

- to educate a diverse student body to be employed in the engineering profession
- to encourage research and scholarship among our faculty and students
- to promote service to the engineering profession and society

Our program educational objectives are reflected in the achievements of our recent alumni:

1 – Engineering Practice: Alumni will successfully engage in the practice of civil engineering within industry, government, and private practice, working toward sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.

2 – Professional Growth: Alumni will advance their skills through professional growth and development activities such as graduate study in engineering, research and development, professional registration and continuing education; some graduates will transition into other professional fields such as business and law through further education.

3 – Service: Alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, charitable giving and other humanitarian endeavors.

Our Student Outcomes are what students are expected to know and be able to do by the time of their graduation:

1. an ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Revised: 2/13/18
