MECH 234 and MECH 235  
ENGINEERING MECHANICS: STATICS  
Summer 2017  
May 22 – June 26

Text:  

Can be purchased from bookstore  or  you can reproduce pages from:  
http://www.ncees.org/exams/study_materials/fe_handbook/  

Classes and Instructors:  
**MECH 234-111** and **MECH 235-111**  
both sections meet together  
Monday, Wednesday, and Thursday, 6:00-9:00 p.m. in CKB-217

First summer session, May 22 – June 26  
Ms. Marwa Korayem, PhD candidate, 732-718-3596,  
mi45@njit.edu

Teaching Assistants:  
Tutoring in 423-Colton Hall  – Your instructor will provide the hours available for tutoring. Seek help when needed. Tutoring will help to understand concepts.

Prerequisites:  
*Phys 111, Math 112. Provides an understanding of equilibrium of particles and rigid bodies subject to concentrated and distributed forces.*

Students must earn a C or better in this course to register for Strength of Materials, MECH237.

Course Policies:
- Attendance is mandatory
- There will be NO need for electronic devices during class time.
  Turn OFF your cell phone and put it away.
  Put away your laptop, tablet, or any other electronic device.
- Bring your textbook to each class meeting or pages from the relevant chapter.
- Take notes and pay attention. Ask questions.
- Be prepared to participate with board work and/or class problem solving. Bring your calculator.

Quizzes, Exams and Grading Policies:
- There will be nightly quizzes beginning with the second class meeting. Quizzes will be 50% of your overall grade.
- There will be a Mid-Term Exam for 25% of your grade.
- There will be a Final Exam during the last class for 25% of your grade.
- Quizzes and exams must have Free-Body-Diagrams with Force Vectors shown. ALL work must be shown for full credit.

  There will be NO make-up quizzes or exams unless there is documentation provided to the Dean of Students Office to validate your absence. Such circumstances may include sickness documented by a doctor or NJIT Health Service; a receipt from your mechanic for car failure; etc.
- We do NOT drop the lowest grade.
- We do NOT curve the grades.
- For more information on the grading scale, go to the link for “additional course information”.

Homework Policies:
- Follow the syllabus and do the homework problems suggested. Quiz problems may be taken from the homework problems or be very similar to the homework or those Sample Problems in the textbook.
- Homework may be collected on a random basis. Not all assigned problems will be collected. Only a select few will be collected randomly. Do your homework. Have it ready each week.
- NO late homework will be accepted.
- All homework MUST include a Free-Body-Diagram to show Force Vectors. All work must be shown for full credit.
- Homework NOT submitted will earn MINUS points deducted from your overall quiz grades. Have your homework ready each class meeting.
- For more information on the format for homework and the type of paper, please refer to the link for “additional course information”.

*The NJIT Honor Code will be upheld and any violations will be brought to the immediate attention of the Dean of Students.
Problems in **Blue are links** to examples from a textbook by Beer & Johnston 6th edition, found at the Reserve Desk, Library, but similar to those found in current edition with different numbers.

| 1 May 22 | Ch. 1: Introduction  
Ch. 2: Statics of Particles, Trig Method (sketch force polygon) | Study p. 2 - 14  
p. 16 - 25 | Sketch force polygon, use Law of Sines and Cosines to solve.  
Ch. 2: 2, 6, 10, 12, 20 |
| 2 May 24 | Ch. 2: Rectangular Components  
Equilibrium of a Particle | p. 29 - 35  
p. 39-46 | Ch. 2: 21 & 31, 23 & 32, 36  
Ch. 2: 44, 46, 47, 66 |
| 3 May 25 | Ch. 2: Forces in Space  
Forces and Equilibrium in Space  
Review and Summary | p. 52 - 62  
p. 66-70  
p. 75 - 78 | Ch. 2: 71 & 72, 91 & 92  
Ch. 2: 100, 105  
**Helpful:** 2-66, 89 & 90, 2-114 |
| 4 May 31 | Ch. 3: Rigid Bodies:  
Equivalent System of Forces | p. 83–99 | Ch. 3: 2, 4, 21, 24 and 29  
3.11 done on “examples” |
| 5 June 1 | Ch. 3: Couples and Force-Couple Systems  
Equivalent Systems  
Review and Summary | p. 120 – 128  
p. 136–150  
p. 161 – 168 | Ch. 3: 70, 72, 76, 96  
Ch. 3: 101, 106, 114 |
| 6 June 5 | Ch. 4: Equilibrium of Rigid Bodies  
Equilibrium of a Two-Force Body  
Review and Summary | p. 170 – 184  
p. 195 – 198  
p. 225 – 229 | Ch. 4: 4, 8, 22, 28, 36  
Ch 4: 67, 68  
**Helpful:** 4,3,12,17,26,30, [43,72,101] |
| 7 June 7 | Ch. 6: Analysis of Structures:  
Method of Joints | p. 298 – 309 | Ch. 6: 2, 7, 18, 28  
**Helpful:** 14, 27 [13, 28] |
| 8 June 8 | MID-TERM EXAM excludes material from Ch. 6.  
Begin topic of Truss by Section Method (very useful for MECH 237) | | |
| 9 June 12 | Ch. 6: Truss Analysis:  
Method of Sections | p. 317 – 324 | Ch. 6: 45, 47, 52, 54 |
| 10 June 14 | Ch. 6: Frames and Machines  
Review and Summary | p. 330 – 339  
p. 361 – 365 | Ch. 6: 76, 88, 92, 102, 105 |
| 11 June 15 | Ch. 5: Distributed Forces:  
Centroids and Center of Gravity | p. 230 - 244 | Ch. 5: 3, 6, 8, 9  
**Helpful:** [25, 32, 34, 79] |
| 12 June 19 | Ch. 5: Distributed Loads | p. 262–268 class notes | Ch. 5: 66, 69, 70, 76  
**Helpful:** 5,78, 81, 83 |
| 13 June 21 | Ch. 9: Distributed Forces:  
Moments of Inertia | p. 485 – 491  
p. 498 – 506 | Ch. 9: 4 and 8  
composites, Ch. 9: 32 and 34, 44 |
| 14 June 22 | Ch. 9: Parallel Axis Theorem | p. 513 – 519 | Ch. 9: 72, 73, 74 |
| 15 June 26 | Final Exam | Dates to be announced by Registrar at a later date. | |
**Homework to be assigned by your professor. Homework will be collected randomly per your professor. NO LATE homework can be accepted after the due date.

*Students will be consulted with by the instructor and must agree to any modifications or deviation from the syllabus throughout the course of the semester.

CEE Mission, Program Educational Objectives and Student Outcomes

The mission of the Department of Civil and Environmental Engineering is:
• to educate a diverse student body to be employed in the engineering profession
• to encourage research and scholarship among our faculty and students
• to promote service to the engineering profession and society

Our program educational objectives are reflected in the achievements of our recent alumni.

1 - Engineering Practice: Recent alumni will successfully engage in the practice of civil engineering within industry, government, and private practice, working toward sustainable solutions in a wide array of technical specialties including construction, environmental, geotechnical, structural, transportation, and water resources.

2 - Professional Growth: Recent alumni will advance their skills through professional growth and development activities such as graduate study in engineering, professional registration, and continuing education; some graduates will transition into other professional fields such as business and law through further education.

3 - Service: Recent alumni will perform service to society and the engineering profession through membership and participation in professional societies, government, educational institutions, civic organizations, and humanitarian endeavors.

Our student outcomes are what students are expected to know and be able to do by the time of their graduation:

(a) an ability to apply knowledge of math, science, and engineering
(b) an ability to design and conduct experiments, as well as interpret data
(c) an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
(d) an ability to function on multi-disciplinary teams
(e) an ability to identify, formulate, and solve engineering problems
(f) an understanding of ethical and professional responsibility
(g) an ability to communicate effectively
(h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
(i) a recognition of need for, and an ability to engage in life-long learning
(j) a knowledge of contemporary issues
(k) an ability to use techniques, skills and modern engineering tools necessary for engineering practice

<th>Course Objectives Matrix; MECH 235 Statics</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Strategies and Actions</strong></td>
</tr>
<tr>
<td>Present engineering approach and problem solving techniques used for vector analysis.</td>
</tr>
<tr>
<td>Illustrate applications to practical problems of torque, moments, and couples.</td>
</tr>
<tr>
<td><strong>Course Objective 1: Provide transition from Physics (science) to Statics (engineering).</strong></td>
</tr>
<tr>
<td><strong>Course Objective 2: Master the concept of two-dimensional and three-dimensional vectors.</strong></td>
</tr>
<tr>
<td>Illustrate 2D vector components by orientation using trigonometry and proportions.</td>
</tr>
<tr>
<td>Use vivid Power Point examples to demonstrate analysis technique for force systems on beams and trusses and frames.</td>
</tr>
<tr>
<td>Demonstrate logical approach to spatial vectors by visualization of forces, moments.</td>
</tr>
<tr>
<td><strong>Course Objective 3: Master the concept of developing free body, diagrams and how to formulate and structure problems solving techniques which is fundamental to the solution of all engineering problems.</strong></td>
</tr>
<tr>
<td>Require FBD's, for all problems and emphasize importance of vector directions.</td>
</tr>
<tr>
<td>Illustrate the approach of going from the FBD to the problem solution by formulating the appropriate equation set.</td>
</tr>
<tr>
<td>Provide numerous solved problems available on web. Require numerous homework problems weekly.</td>
</tr>
